

# PASCAL Project Presentation

Idea from the 2006 PASCAL Visual Object Classes Challenge

Mark Everingham, Luc Van Gool, Chris Williams, Andrew Zisserman

<http://www.pascal-network.org/challenges/VOC/voc2006/index.html>

# PASCAL Project: Examples

# PASCAL Challenge 2006

- 22 participants submitted results
  - 14 different institutions: Oxford, Cambridge, MIT, QMUL, INRIA, etc
- 28 different methods
  - 19 for classification task only
  - 4 for detection task only
  - 5 for classification and detection
- Pascal Challenge 2012
  - More objects: 20
  - More images: +10000
  - More challenges

# PASCAL Project: Objective

## **Object Classification in realistic images**

- Ten object classes
  - Bicycle, bus, motorbike, car, cat, cow, dog, horse, sheep, person
- Classification
  - Predict whether at least one object of a given class is present

# Image Dataset (PASCAL 2006)

- Images taken from three sources
  - Personal photos contributed by Edinburgh/Oxford
  - Microsoft Research Cambridge images
  - Images taken from “flickr” photo-sharing website
- Annotation
  - Bounding box
  - Viewpoint: front, rear, left, right, unspecified
  - “Truncated” flag: Bounding box  $\neq$  object extent
  - “Difficult” flag: objects ignored in challenge

# Our Image Dataset

	train		val		trainval		test	
	img	obj	img	obj	img	obj	img	obj
<b>Bike</b>	25	32	28	32	53	64	53	65
<b>Bus</b>	18	23	16	23	34	46	36	46
<b>Car</b>	54	85	56	85	110	170	108	170
<b>Cat</b>	38	42	38	43	76	85	77	85
<b>Cow</b>	20	31	20	31	40	62	39	63
<b>Dog</b>	37	42	35	42	72	84	74	84
<b>Horse</b>	25	32	23	32	48	64	50	64
<b>Motorbike</b>	23	27	23	27	46	54	46	54
<b>Person</b>	63	115	69	115	132	230	135	230
<b>Sheep</b>	23	42	26	42	49	84	47	84
<b>Total</b>	255	475	268	475	523	950	537	950

# Classification Task

- Predict whether at least one object of a given class is present

Is there a Bike? YES

Confidence

0.85

Is there a Bike? NO

0.05

# Classification Task: Evaluation

- Receiver Operating Characteristic (ROC)
  - Area Under Curve (AUC)

# Classification Task: Evaluation

- Receiver Operating Characteristic (ROC)
  - Area Under Curve (AUC)

# Classification Task

- Train on the supplied data
  - Choose a good strategy
  - Choose the appropriate features / classifiers
  - Which methods perform best given specified training data?
- Test the classifiers on the supplied data
  - Provide results for each object class

# PASCAL Project: Coursework

- What do we expect?
  - Problem comprehension and understanding
  - Analysis, design and implementation of at least one strategy (BoW)
  - Results evaluation
  - Academic presentation (writing doc)
- Scheduling

# Scheduling

Pascal deadline!!!

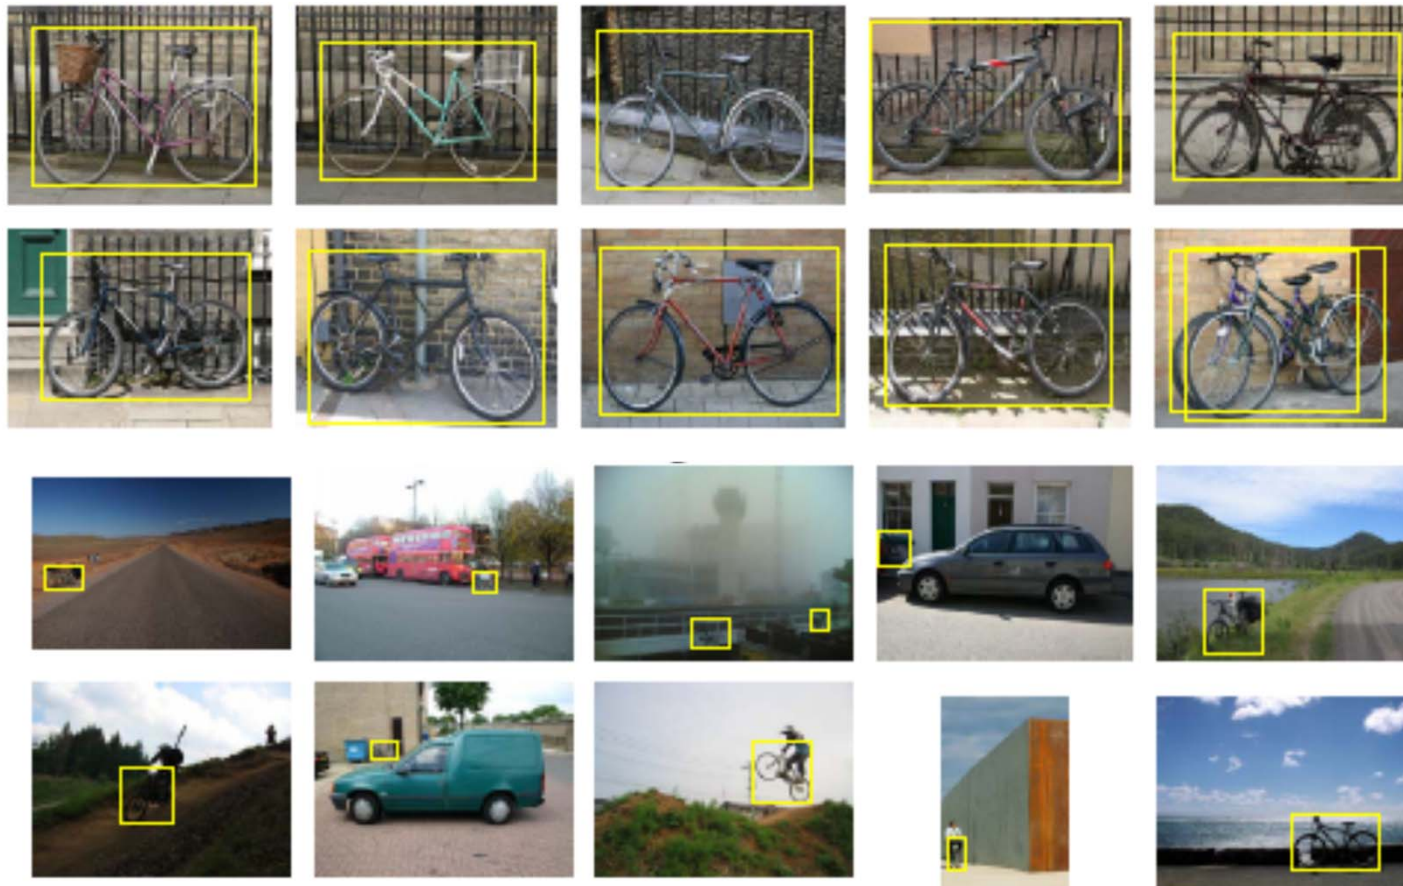

# PASCAL Project

FINAL MARK= 30% from P1&P2 + 40 % from PASCAL PROJECT + 30% by Lectures given by the students

## Criteria:

- From P1 & P2: 70% strategy and results + 30% document
- From PASCAL PROJECT: 70% strategy and results + 30% document
- From Lectures given by students: 50% document + 50% presentation and interaction

# Examples: Bicycle

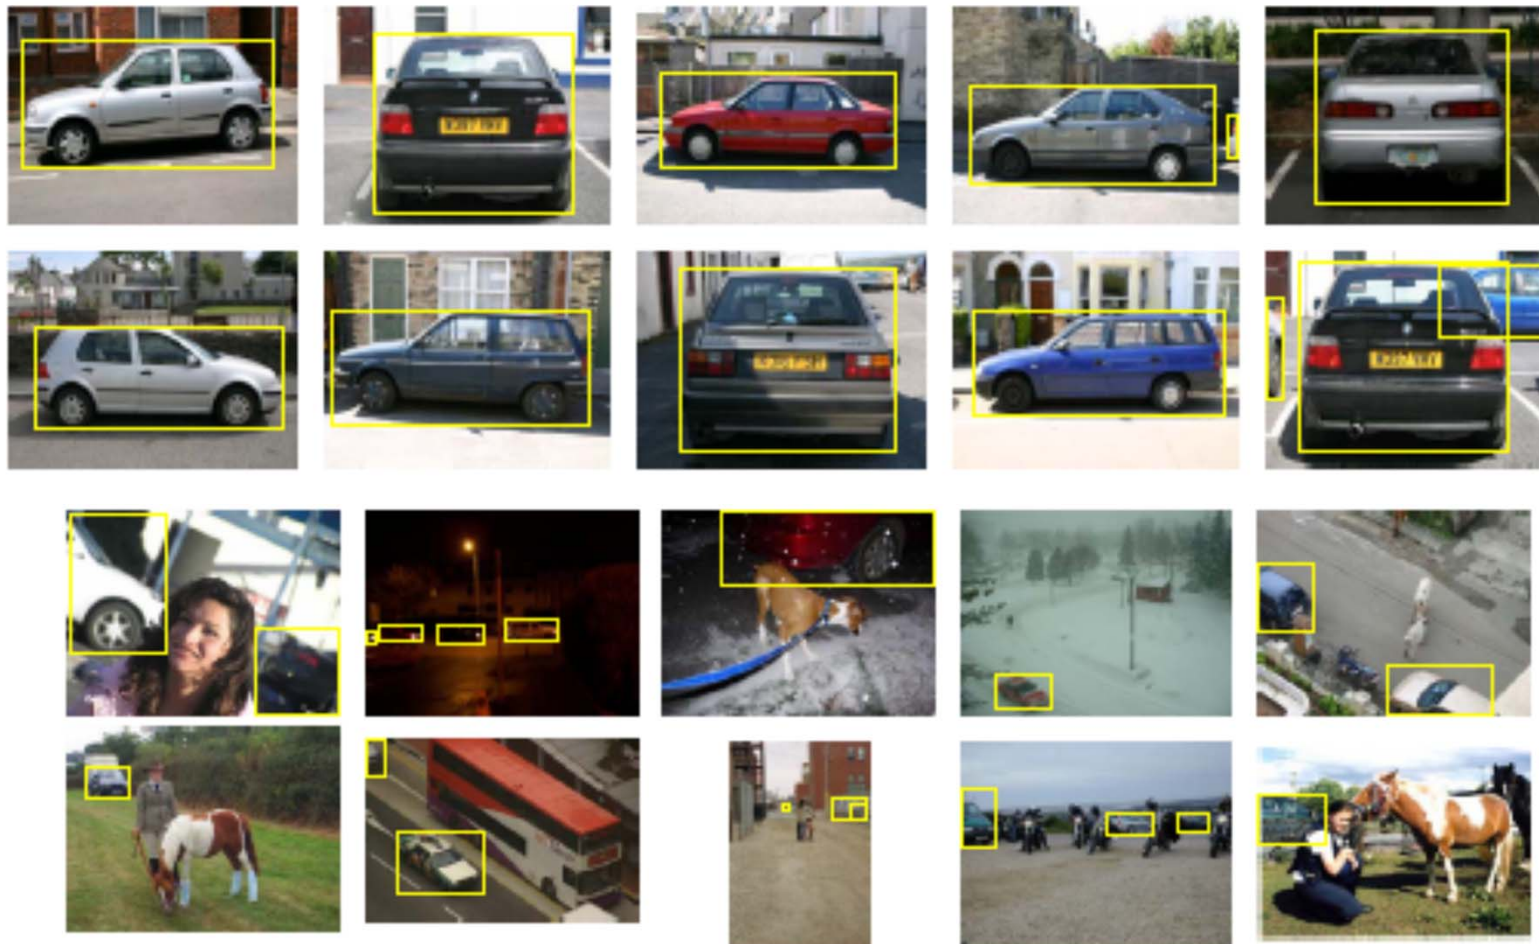

# Examples: Bus

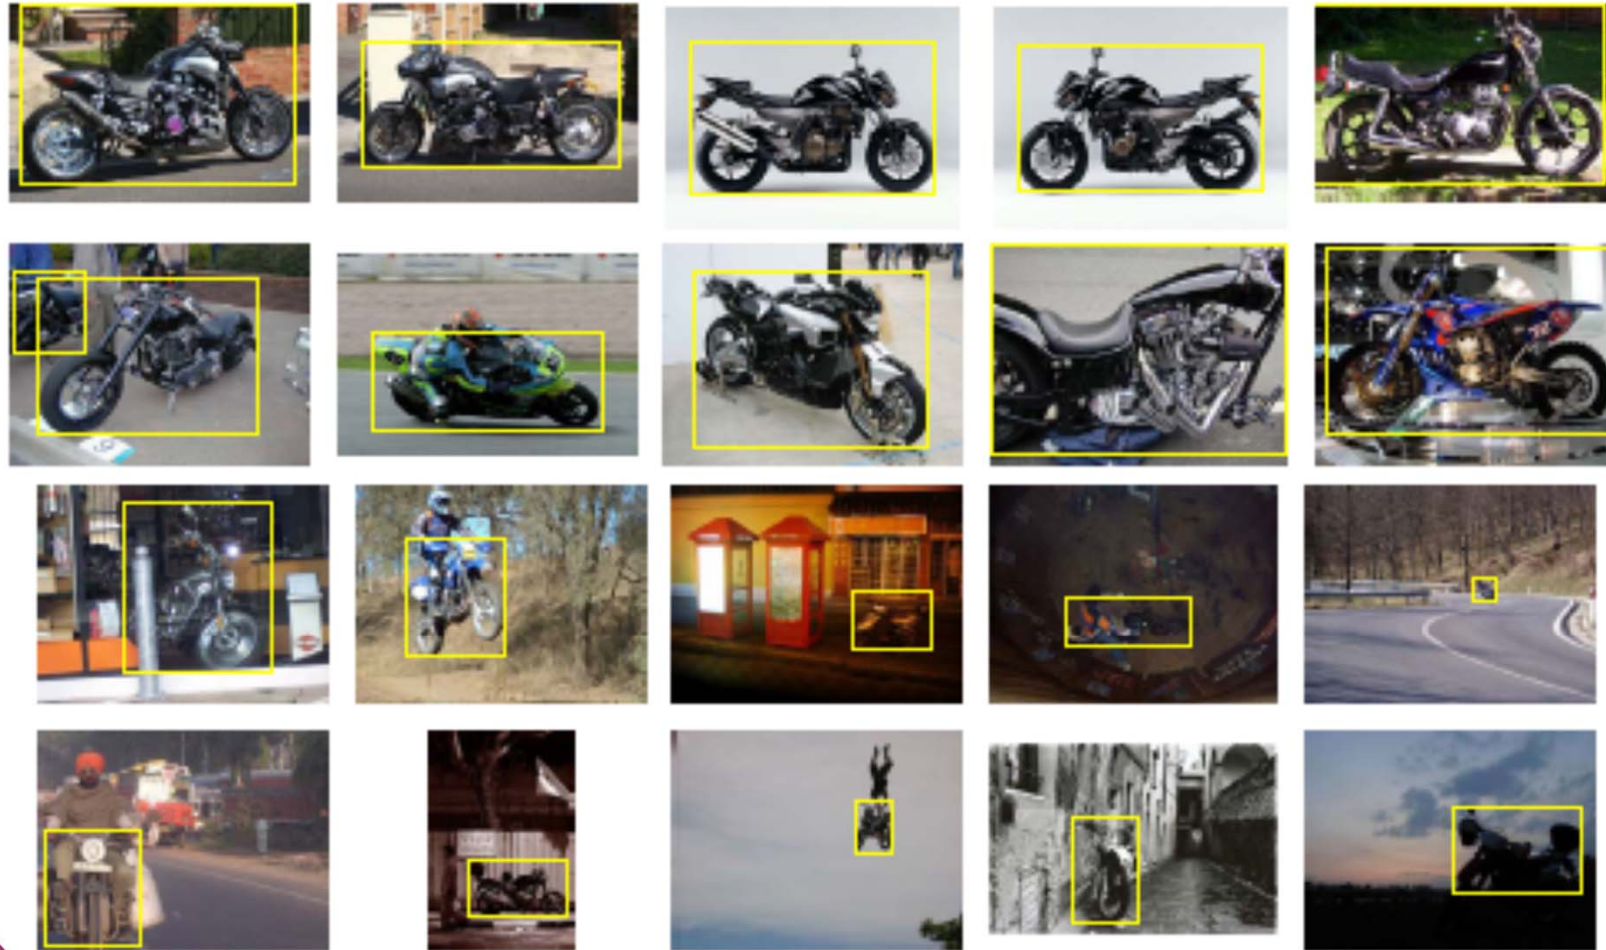

# Examples: Car

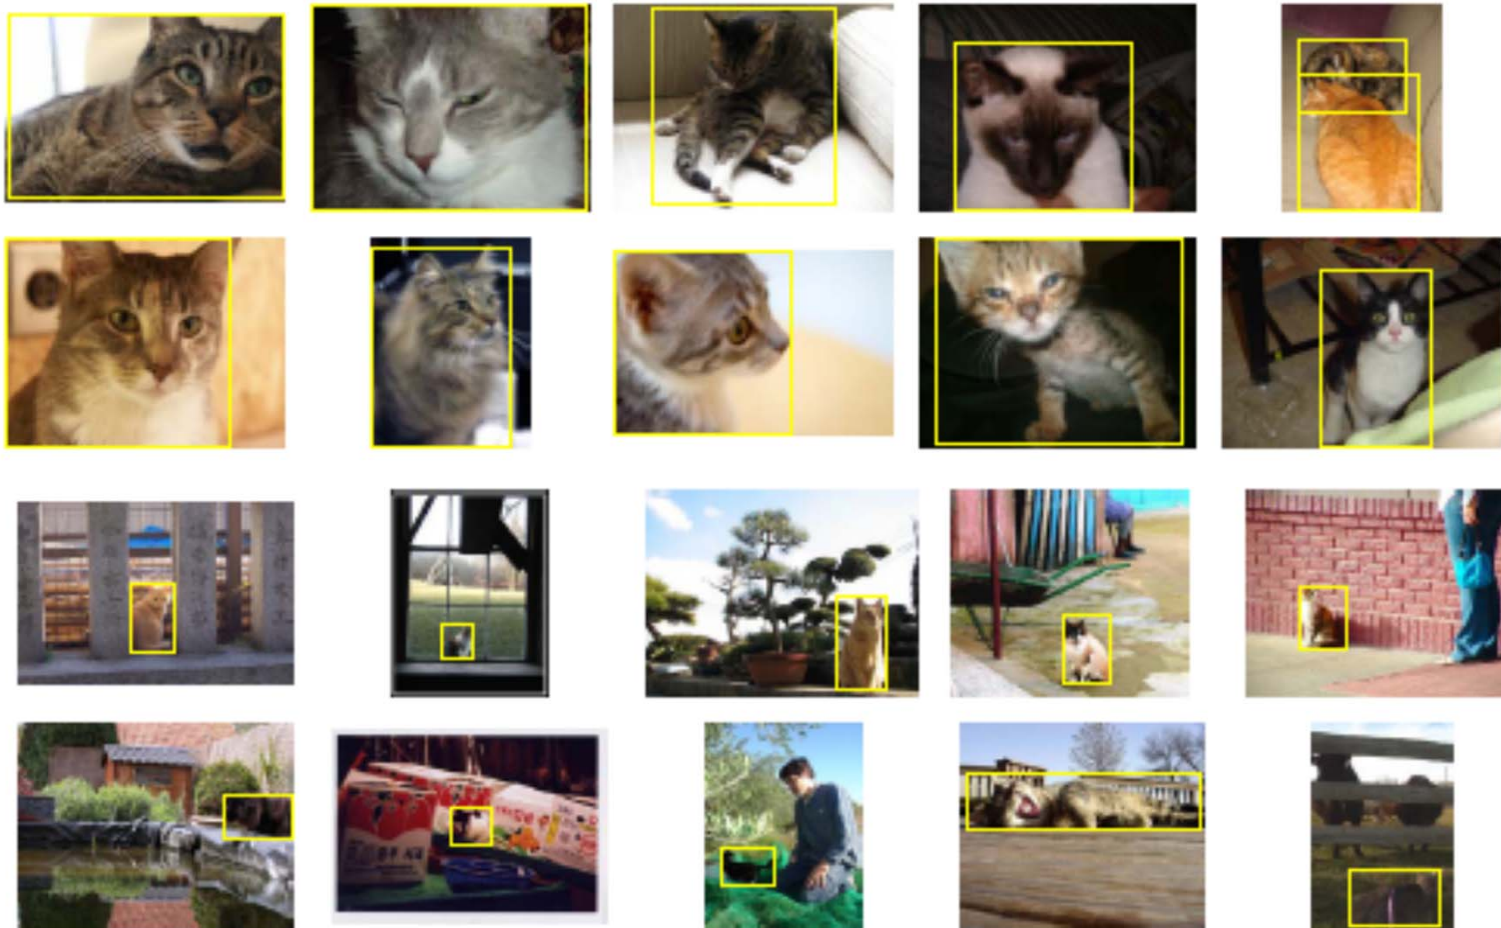

# Examples: Motorbike

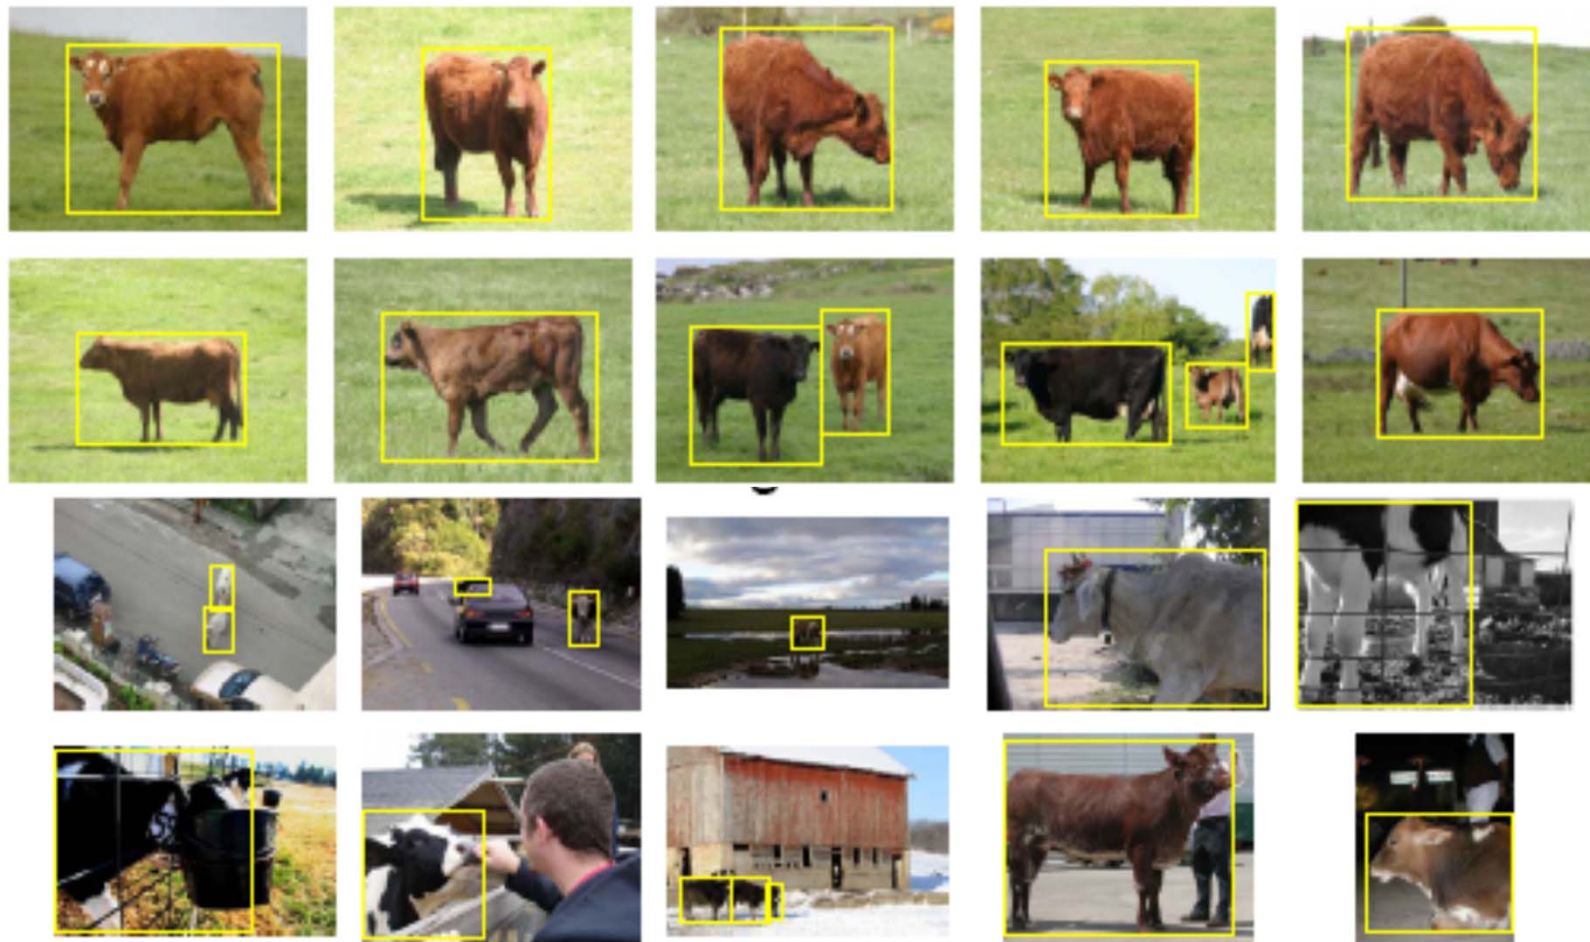

# Examples: Cat

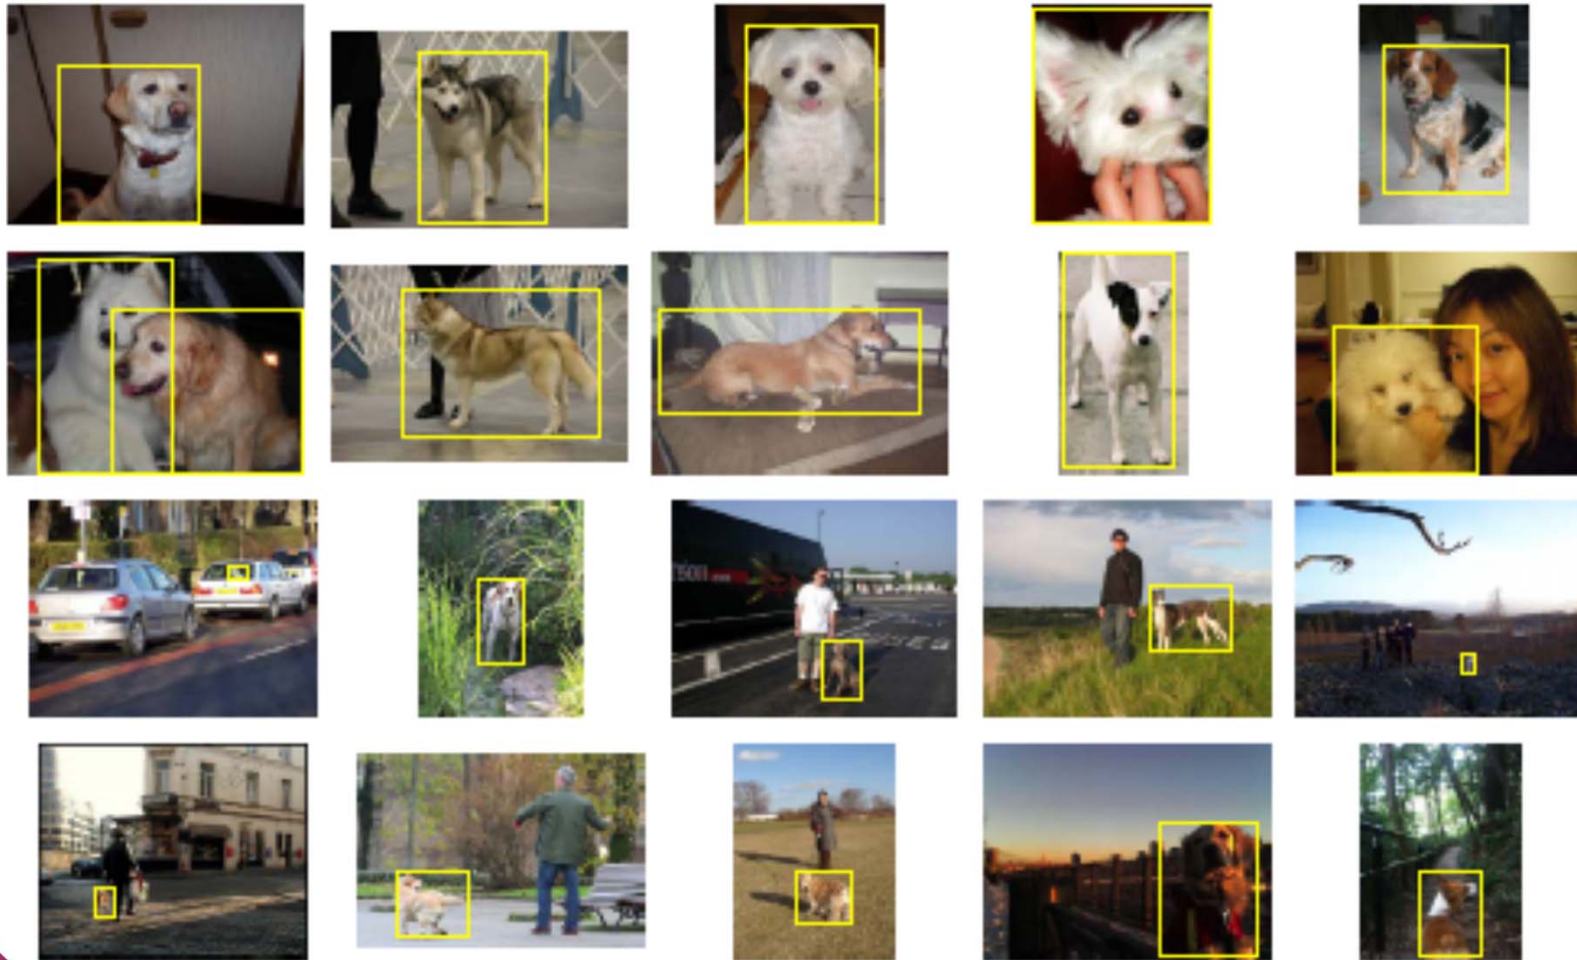

# Examples: Cow

# Examples: Dog

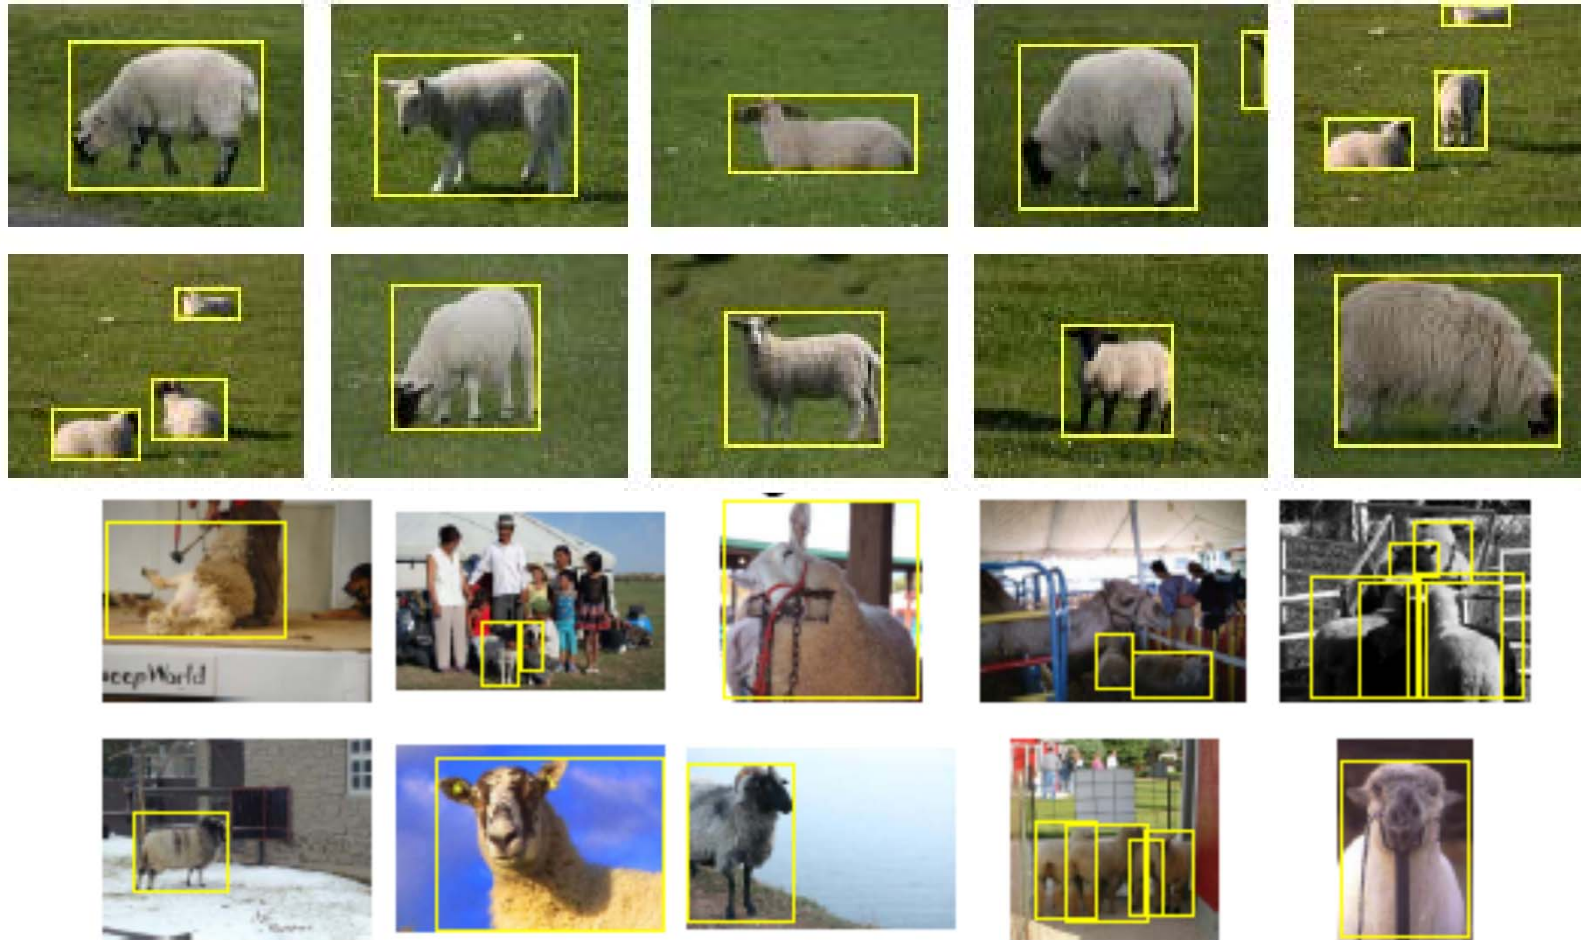

# Examples: Horse

# Examples: Sheep

# Examples: Person

# PASCAL Project: Guidelines

- **PRTools4** toolbox or **weka** toolbox
  - Matlab toolboxes for Pattern Recognition
- Sift library (Matlab) (**Vlfeat** for dense sift)
  - To extract sift descriptors from an image
- 2006 **Pascal Development Kit** (Matlab)
  - Follow the ***example\_classifier.m***
  - It simplifies the access to the image files (training, validation and test sets)
  - Automatic results generation (ROC, Az value)

# PASCAL Project: Guidelines

- Colour, Texture, SIFT, etc
- 1 classifier per object class (binary decision)
- Training / Testing steps
  - NN, K-NN, SVM, Adaboost ...
- Dense vs Sparse strategies
  - Features extracted from a grid of patches / Sliding window for classification
  - Features extracted from interest points / Standard image classification

# PASCAL Project Presentation

Good luck!!!  
Hope you will enjoy this project!
